CDL Plumbing and Heating both came out within hours of calling on a Sunday afternoon during the freezing winter storm even though they were busy and backed up. The plumbing department fixed our frozen meter to get our water running again. I cannot thank them enough for responding to our call and coming out when they did!! I had just had surgery and brought a newborn home; they took a lot of stress and worry off me by fixing our no running water issue that day. I will definitely use them again in the future.

CASEY BOLTON

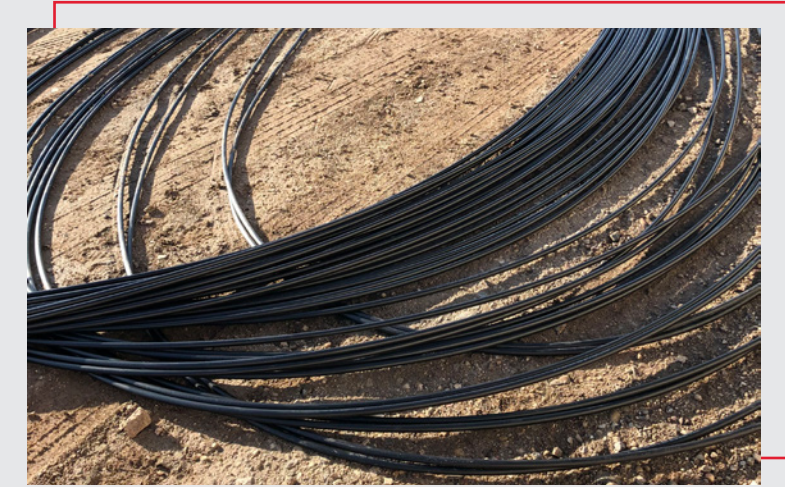

TECHNICAL SOLUTIONS.

In this age, staying connected is paramount to building meaningful relationships, participating in the community, and providing essential services.
